

REGUEIRÓN

2023

Regueirón is a vineyard designate wine named after the exceptional, grand cru plot from where the grapes for this wine are grown.

Type of wine: White

Region of production: Valdeorras

Year: 2023

Grape varieties: Godello and very small percentages of Treixadura and Albariño

Type of bottle: Burgundy

Production and bottle size: 2,488 bot. 75cl. and 60 bot. 1.5l

Bottling date: February 2025

Ageing and barrel type: 11 months in 500l barrels & ceramic stoneware 600l. 3 months in foudre

Alcoholic volume: 13.5%

pH: 2.90

Total acidity: 7.20

Suitable for vegans

The vineyard

Regueirón is the name of the vineyard of 0.42 ha where the grapes for this wine come from, located in the easternmost area of Valdeorras, on the terraces of our vineyards in the village of Entoma - Val do Galir. South and southeast facing, with a 40% slope that favors good sun exposure and aeration. Soils of clay and slate. The grapes in this vineyard ripen earlier, but with great acidity, providing a marked Atlantic character.

The soils are deep but retain nutrients and minerals well. Part of the minerals that are supplied to the roots are favored by the erosional decomposition of the slates. A sustainable viticulture is carried out.

Winemaking

The grapes are manually harvested in crates of 15kg, of grapes at the selection table. maceration in a cold room for 24 hours, prior to a manual selection Direct pressing.

Spontaneous fermentation in 3 barrels of 500l (1 new and 2 of 1 wine) and a 600l ceramic stoneware vat (CLAYVER) later assembled for 2 months in 1 foudre of 2,000l.

Vintage / Harvest description

The 2023 harvest in Val do Galir was the earliest in the history of Valdeorras, starting the last week of August in the slate soils, marked by a rainy spring and dry summer with very high temperatures in mid-August. Higher alcoholic ripening due to the heat shock, better PH and acidity due to yields 15% higher than the 2022.

Regueirón 2023 was harvested on September 10 just before the rains, and was able to withstand the high temperatures better than other plots due to its high leaf density, which served as a hat for the clusters. The vineyard is almost 30 years old.
