Hectares: 30

Fermentation: in underground concrete tanks

Ageing: 8 months in concrete tanks

Sindicat La Figuera is the recovery of an illusion, a project of 6 farmers from La Figuera. A unique village in Montsant, with a very special characteristics: located in the highest point of the region - 550m-, their *garnatxa* vines –the only varietal– planted in goblet and ages between 30 and 80 years old stand out for their personality and particularity.

The freshness of the altitude gives its wines hints of citrus and flowers that are not found in other wines in the area. If we add their traditional way of making wine in underground concrete tanks, here is the result: a light and fresh wine.

2020 vintage it is marked by the heavy rains that took place in the south of Catalonia (temporary *Glòria*) in January. In spring, rainy days alternated with days of splendid sunshine that caused the largest mildew attack we have ever had in our region. It is why *Sindicat's* production is the lowest. A rigorous summer gave us healthy grapes with very good acidity be able to make a pure, clear, concentrated and refreshing *Sindicat* as we had for years. Vintage of contrasts to get a few glorious bottles.
